

# Sans commentaire

Juste 2 astuces pour ne pas afficher les commentaires (par exemple, utile lors de la lecture de fichiers de configuration)

## Base egrep

```
egrep -v "#|$^" MonFichierDeConf
```

## Base sed

```
alias nocomments='sed '\''/^[[[:blank:]]*#/d;s/#.*//;/^$/d'\''
```

Puis

```
cat MonFichierDeConf | nocomments
```

## Exemples

```
ragnarok@fenrir:~$ cat /etc/nginx/sites-available/default

#
# In most cases, administrators will remove this file from sites-enabled/
# and
# leave it as reference inside of sites-available where it will continue to
# be
# updated by the nginx packaging team.
#
# This file will automatically load configuration files provided by other
# applications, such as Drupal or Wordpress. These applications will be made
# available underneath a path with that package name, such as /drupal8.
#
# Please see /usr/share/doc/nginx-doc/examples/ for more detailed examples.
