# Modifier le mot de passe root oublié

### Editer le grub

Au lancement du système, lors de l'affichage du **grub**, tapez sur la lettre "**e**" afin de passer en mode **Édition**.

## **Apporter les modifications**

Chercher alors l'entrée "linux" et modifier le "ro" (read only) en "rw" (read write).

Attention si le clavier est en qwerty le "w" est la touche "z"

A la fin de la ligne ajouter, "init=/bin/bash"

Attention si le clavier est en gwerty le "/" est la touche "§" et le "a" la touche "q"

Faire attention respecter bien l'ordre indiqué, c'est important.

### **Démarrer**

Une fois ces modifications apportées, presser soit

```
ctrl + X
```

ou

F10

### Changer de mot de passe

Un shell root sera lancé automatiquement, il suffira alors de changer son mot de passe avec la commande :

#### passwd

```
